DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: of incomprehensible language: for example "...proceeded to under low voltages,.." and the symbol "~" has been used throughout the specification to indicate a range between frequencies. The suggested symbol, "–" should be used.

Appropriate correction is required.

Claim Objections

3. Claim 7 is objected to because of the following informalities: line 3, recites, "circle". The suggest word should be -- circuit --. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

6. Regarding independent claim 1 (dependent claims 6-7), the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

7. Regarding claims 1, 2, 4, and 5, respectively comprises claim language that renders the claim and the invention indefinite. It is unclear to the examiner as what the claim should encompass. The claims should be written with clarity as what is exactly being claimed.

8. Claims 2 recites the limitation "same ratio" in lines 5 and 6. There is insufficient antecedent basis for this limitation in the claim.

Thus, due to the indefiniteness of the claim language, a reasonable search of prior art has not been considered by the examiner at this time.
